Turning Radius	Fuel Tank Capacity (L)	Seat Height	Front Axle	No. of Speeds	Optional Catcher Part No.
18"/46cm	10	High Back	Cast Iron	Infinite	1695642

**Dual Response™ Steering**

Dual independent steering linkage allows more precise, responsive steering and a tighter turning radius for easier manoeuvrability.

**Lumbar Support Seat**

Designed to support the lower back while cradling you in position for a comfortable fatigue-free ride.

**Quick-Stall™ Safety Switch**

If you leave the seat with the blades engaged, the blades stop and the engine automatically shuts off.

**Fender Mount™ Cut-Height Control**

**Fingertip™ Seat Adjustment**

No tools are required to custom-fit seat to the most comfortable operating position.

**WideBody™ Design**

Murray® tractors feature a wide wheel base and low centre of gravity. Stability and visibility deliver confidence and control. Step-thru design offers more leg room and easier access to the tractor.

**Twin-Beam Power Frame™**

Two solid steel rails create an extra strong, automotive-like, super durable frame once available only on commercial tractors.

**Pedal Touch AutomaticDrive™ (selected models)**

Foot pedal precisely controls forward and reverse speeds without shifting or clutching, so your hands never leave the steering wheel.

**3-Way Cutting Deck™**

Mulch, bag or discharge with a powerful contoured cutting chamber for consistent, finished look. Mulch kit and bagger optional.

**All-Steel Construction™**

Unlike many competitors who make extensive use of plastics, the Murray® frames and bodies, are made of 100% steel for precision and strength.

**2-Coat Paint Finish**

Each Murray® tractor is finished with two full coats of paint for long lasting protection and the industry's best shine.

**Model Specifications**

Model	Dimensions (L x W)	Engine	cc	HP	Deck	Size	Blade	Start	Safety	Blade Engagement
